

Centro Euro-Mediterraneo
per i Cambiamenti Climatici

Scenari futuri di cambiamento climatico nel Mediterraneo e in Italia

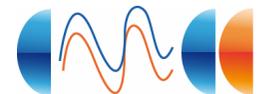

Silvio Gualdi, Centro Euro-Mediterraneo per i Cambiamenti Climatici
Istituto Nazionale di Geofisica e Vulcanologia

Climatica...mente Cambiando, TRENINO CLIMA 2011

“Impatti, mitigazione e adattamento: una scommessa globale sul clima che verrà, 9 Settembre, Trento

Piano della Presentazione:

- **Cambiamento Climatico: osservazioni dirette**
- **Modelli Numerici e Simulazioni del Clima**
- **Proiezioni di Cambiamento Climatico: scala regionale (Mediterraneo)**
- **Proiezioni di Cambiamento Climatico: zoom sull'Italia**

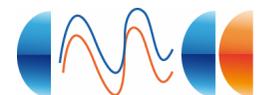

Bibliografia e Sorgenti:

IPCC, 2007: *Fourth Assessment Report of the Intergovernmental Panel on Climate Change*.

Modelli Numerici e Simulazioni del Clima

HOW GOOD ARE CLIMATE MODELS TO REPRODUCE THE OBSERVED MEAN CLIMATE?

Evolution of the mean surface temperature observed and simulated

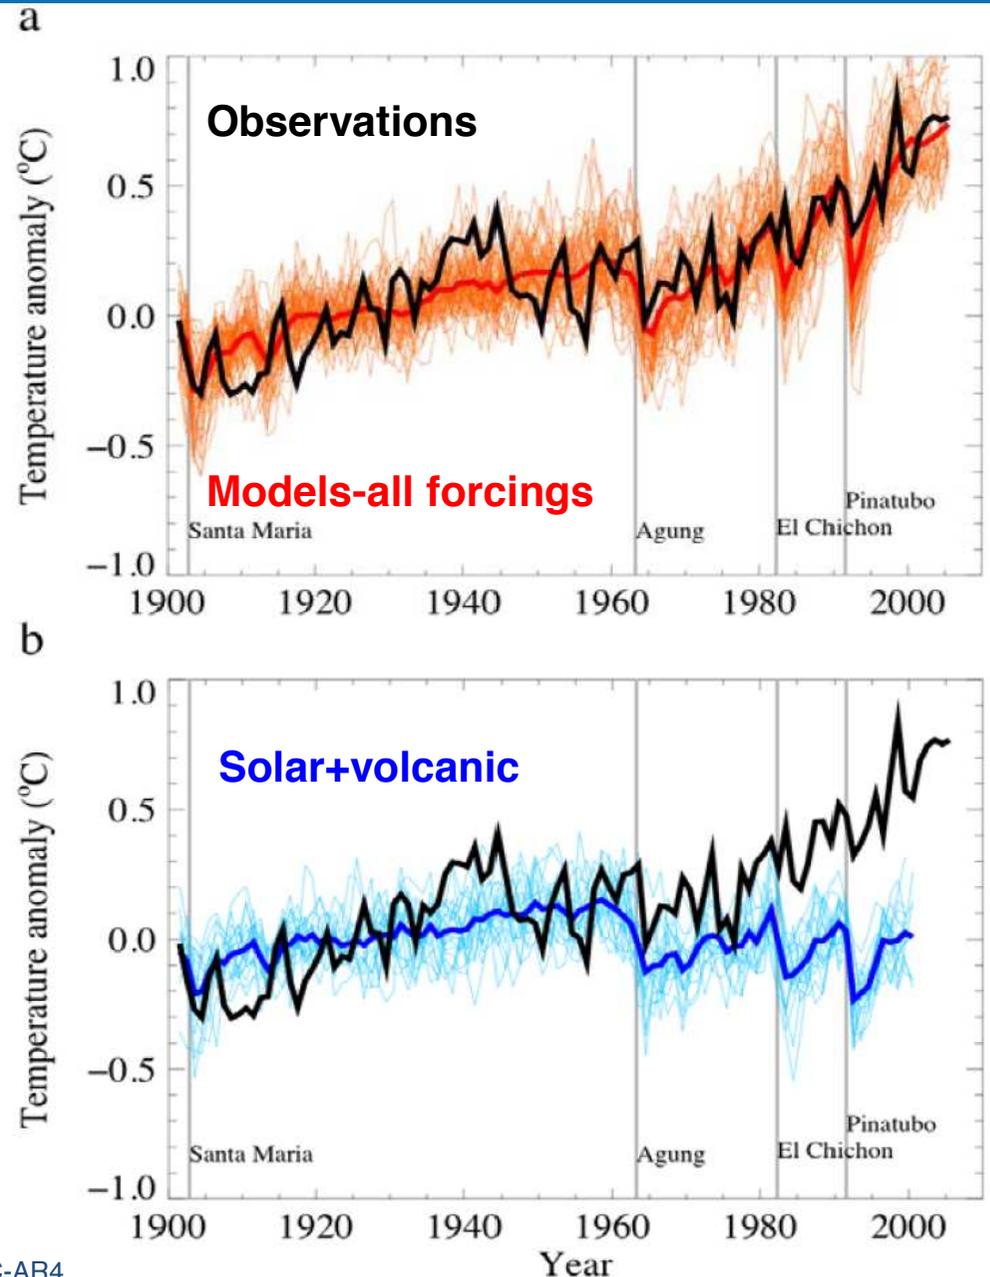

Modelli Numerici e Simulazioni del Clima

Simulation of the 20th century with the Climate models forced with:

- **all forcings (natural+anthropogenic)**
- **only natural (solar+volcanic) forcings**

Observed changes are:

- ✓ consistent with expected responses to all forcings
- ✓ inconsistent with alternative explanations

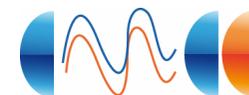

Modelli Numerici e Simulazioni del Clima

I modelli riproducono ragionevolmente bene le principali caratteristiche del clima osservato e i meccanismi fondamentali che sono alla base dei cambiamenti osservati nel recente passato ...

... quindi possiamo utilizzarli per cercare di ottenere informazioni su possibili futuri cambiamenti del clima dovuti alle attività umane (gas serra, aerosol, uso del suolo ...)

PROIEZIONI DI CAMBIAMENTO CLIMATICO

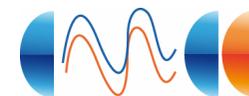

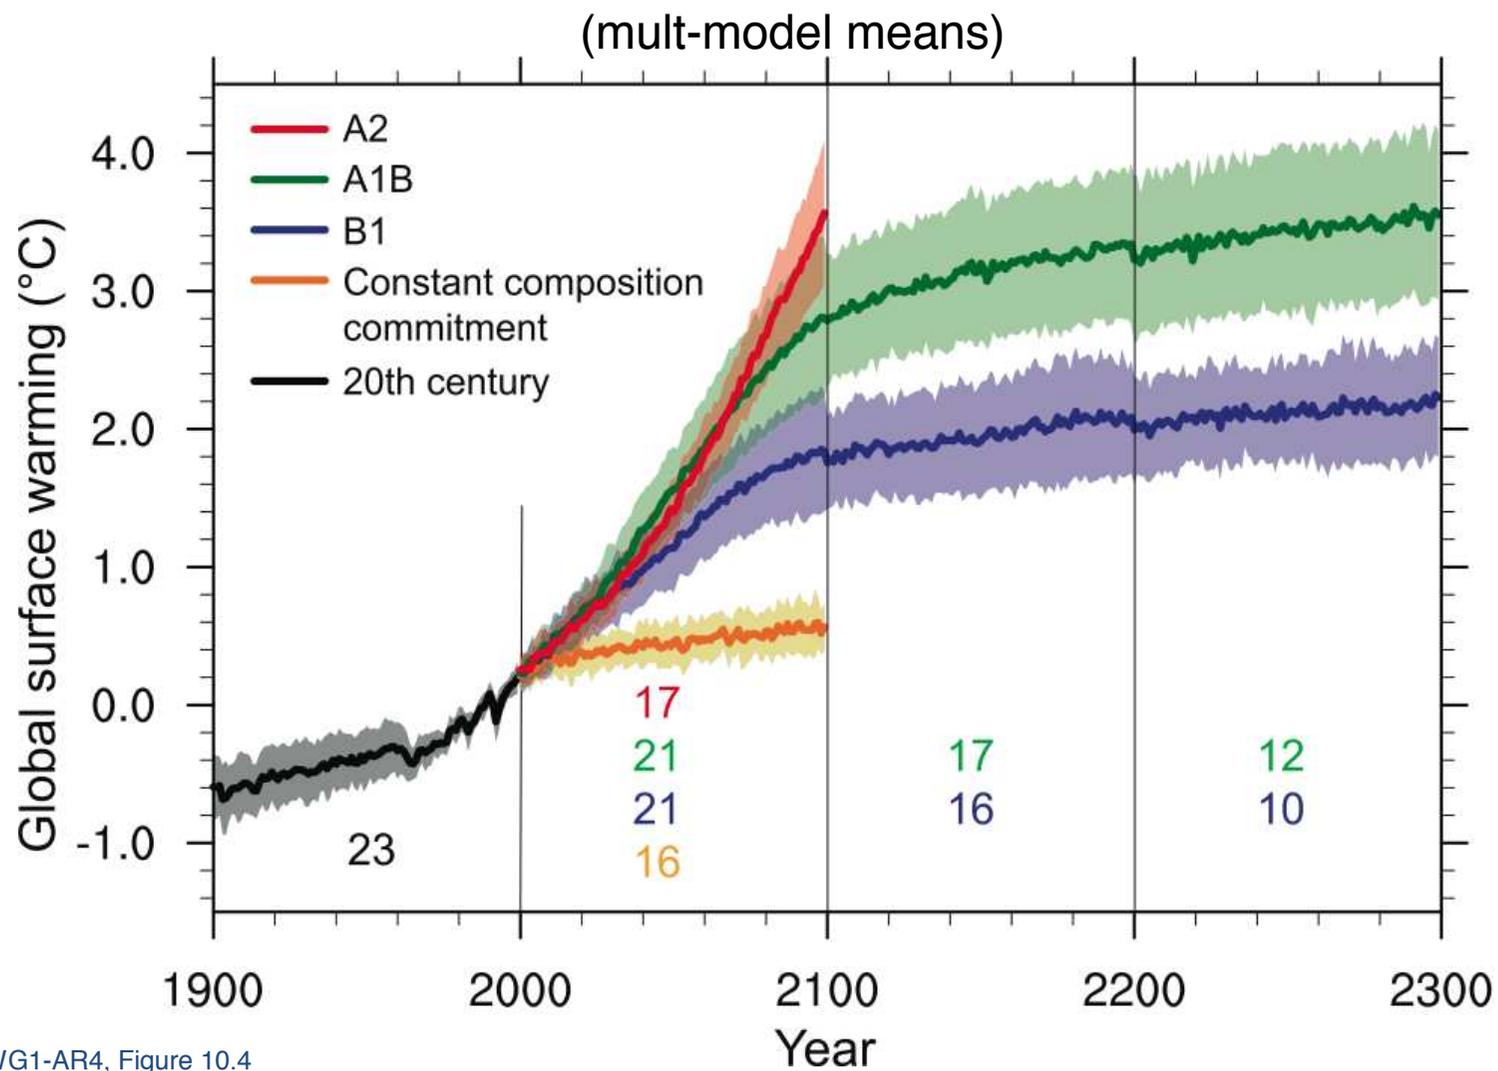

Proiezioni di Cambiamento Climatico

Le proiezioni di cambiamento climatico sono eseguite per mezzo di **SCENARI** (descrizione di un ipotetico **sviluppo socio-economico** del pianeta nel futuro).

Uno scenario provvede informazioni sulle **emissioni** (**concentrations** atmosferiche) di gas serra, aerosol, cambiamento di uso del suolo, etc ... che vengono fornite ai modelli per produrre **proiezioni climatiche**

Sommario e Conclusioni

- ✓ Per poter approntare opportune politiche di adattamento ai cambiamenti climatici, le proiezioni devono fornire informazioni a scala regionale (locale).
- ✓ Proiezioni di cambiamento climatico per il Mediterraneo e la penisola Italiana sono state eseguite in numerosi programmi e progetti internazionali (CIRCE, PRUDENCE, ecc.).
- ✓ Per la regione del Mediterraneo e la penisola italiana le proiezioni indicano un marcato riscaldamento sia in inverno che in estate (fino a + 5°C alla fine del 21° Secolo).
- ✓ Per la precipitazione I risultati delle proiezioni sono meno omogenei: calo generalizzato in estate, mentre in inverno più precipitazioni al nord (Alpi) e diminuzione nel Mediterraneo centro orientale e nel sud Italia.
- ✓ La comunità scientifica è fortemente impegnata nello sviluppo di nuovi modelli ad alta risoluzione e che permettano di includere nel sistema processi a piccola scala per produrre proiezioni sempre più accurate alle scale locali (CMIP5)
