

Graduate students are very welcome in our group.

If you are a student seeking to pursue a M.S. or Ph.D. degree in inorganic chemistry and you are interested in a new and exciting field, then you are encouraged to contact Dr. Schoedel. Please send an email to [aschoedel@fit.edu](mailto:aschoedel@fit.edu) to schedule an appointment and discuss further research opportunities.

We offer you research projects that are non-traditional and have elements of inorganic, organic, physical chemistry or even biochemistry, based on your preferences. Research in our group will be highly rewarding and ultimately lead to high impact publications.
